Unrivalled Features Quality communications

What is HVX (Hosted Voice Exchange) HD Technology?

HVX HD Telephony is a fully hosted and managed telephony service. The service provides the functionality of a high-end telephone system but with no physical on-site system.

Our HD Telephony IP Platform is hosted in a secure and resilient data centre. To connect to our data centre we use managed connectivity. The only equipment on your customer's site is a managed router, a choice of HD quality handsets (or soft clients) and if required; cat5 cabling.

How do you benefit from to HVX Voice HD telephony?

To connect to HVX you simply require a reliable voice quality connection. We believe that call quality is paramount which is why our ADSL has voice QoS (Quality of Service) and we provide ethernet circuits for larger sites and for building secure VPNs between offices. This type of connectivity bypasses the public internet entirely, ensuring the best quality calls for your customers.

Who is HVX Voice HD Telephony aimed at?

HVX is ideal for companies with three or more employees in a head office and/or with two or more sites. HVX can easily scale to accommodate large numbers of users over multiple locations, providing seamless levels of communication functionality.

What are the benefits for your customers of using HVX HD Telephony?

- Business Continuity/DR - easily re-route calls
- Guaranteed 99.9% uptime backed by our SLA
- Scalable - to add and remove users as required
- Complete PBX functionality without the hardware requirement
- Mobility – flexible mobile working to enable seamless remote operation.
- White Labelling – HVX provides for white label billing, provisioning, maintenance and 24/7 network monitoring
- Free on net calls
- Flexible number portability – retain your office number even if you move

What options are available in regards to selling HVX?

The HVX service can be supplied either as a licence only monthly model with no minimum term OR as a complete solution provided by a HVX Managed Delivery.
